Stakeholder Consultation

To ensure that all stakeholders are consulted in order to create a better awareness of the project and draw in expertise, beneficiaries, local resources and thus forge partnerships

Development Plan

To prepare a holistic development plan that shows how the Centre can be developed to roll out sustainability outreach programmes

Permaculture Pilot Outreach Programme

To select the right beneficiaries to pilot the establishment of Permaculture initiatives at Zuvuya and within the Implendle Community

Alternative Technology Outreach Programme

To select the right beneficiaries to pilot the establishment of Earth Building Technology and Alternative Energy Systems at Zuvuya and transfer these skills within the Greater Community

Ecotourism Pilot Outreach Programme

To select the right beneficiaries to pilot the establishment of Ecotourism opportunities at Zuvuya and adjacent areas

Sustainability

Demonstrate sustainability principles through food production, building systems and alternative energy

Community Bridge Builder

Linkage between 1st and 3rd world communities to improve relationships and development opportunities

Rural Upliftment

Develop new sustainability skills in marginalized rural areas in order to improve living standards

Job creation

Transfer new skills to create jobs within the greater community

Organic Products

Grow healthy and nutritious organic produce for food security and income generation

HIV/ AIDs Awareness

Promote HIV/AIDs awareness and wellness through proper nutrition

Partnerships

Create partnerships in development amongst public, private and community stakeholders

Vision

To link 1st and 3rd world communities via a Sustainability Outreach Centre 33100

A Sustainability
Outreach Centre
established in 3
years rolling out 3
Outreach
Programmes that
create 100 new
skills per year
